

LINEAR-MOTION POTENTIOMETER

(Precision Linear-motion, Wirewound, Conductive Plastic & Hybrid Element)

SAKAE Linear-motion Potentiometers are compact in size and light in weight and are capable of transforming mechanical linear movements into corresponding electrical variations. Easy to operate and handy. It is suitable for measurement of linear movements in various machinery and tools and displacements in linearly moving objects such as steering angles, numerical control tooling

machines, robots, etc.

Beside wirewound type (LP), there is another kind of resistive element in this series: Conductive Plastic (FLP-A) which features high resolution, long life expectancy and excellent high speed tracking ability. Please select the resistive element appropriately according to your applications.

THE NOMENCLATURE OF SAKAE LINEAR-MOTION POT. SERIES

S **30** **FLP** **100** **A** - ○○○○○

● **Special Specifications**

S means the potentiometer with special mechanical specifications.

● **Diameter**

30 means 30mm square in cross sectional outer size of the body of the potentiometer. The 5 standard sizes are available, namely, 8mm, 13mm, 15mm, 18mm and 30mm.

● **Type**

FLP means linear-motion, conductive plastic resistive element type potentiometer.

LP..... Wirewound resistive element type.

FLP..... Conductive plastic resistive element type.

● **4 or 5 digits branch number** to be used for specific requirements.

● **Characteristics**

A means a conductive plastic resistive element type. (A is not given to wirewound type.)

D means a conductive plastic resistive element type, directly printed on PCB.

● **Stroke**

100 means effective electrical travel on the resistive element. The 16 standard strokes are available, namely, 10mm, 12mm, 15mm, 20mm, 25mm, 30mm, 50mm, 75mm, 100mm, 120mm, 200mm, 300mm, 400mm, 500mm, 750mm and 1,000mm.

NOTE: The nomenclature of model 18 (F) LP series is mentioned separately in page 80 because of its complexity.

Note: In the case of connector type, please use indications in the parenthesis.

SELECTION GUIDE

Kind of Element	Size (mm)	Model No.	Stroke (mm)	Features
Wirewound	20×18	18LP	15, 30, 50, 100	This model is a substitute model against our old model 20LP series.
Conductive Plastic	8×7	8FLP-A	10, 15	Low-cost and miniature size pot. with a shaft with front and rear extension. Available with spring return device incorporated as special.
	8×7	8FLP-D	10	Low-cost and miniature size pot. with front and rear extension. Available with spring return device as standard version.
	11×13	13FLP	12, 25, 50, 100	Popular type pot. with a front extended shaft. Available with spring return device as special version.
	15×24	15FLP	10, 15, 20, 30	Popular type pot. with screw-mounting method.
	20×18	18FLP A, B, C	15, 30, 50, 75, 100, 150	Rigid housing case and can select the shaft shapes and with connector to your applications.
	32×32	30FLP	100, 200, 300, 400, 500, 750, 1,000	Long-life expectancy and low-cost pot. with a front extended shaft, Various strokes are available.
	10×20	CFL	200, 300, 400, 500, 1,000	Sub-assembled resistive element unit with a wiper. Low-cost and open frame housing.

- Note: 4. In the case of the potentiometer with special resistance values and special specifications, the above performances may vary and therefore, please consult us in advance, separately.
 5. As for operating temperature range, we can't always guarantee exactly the same performances and values in actual industrial applications even if the temperature out there is within standard range. (Please see page 23 in this catalog for further details.)
 6. All values of each parameter were measured under standard temperature and standard testing conditions. For the values during the tests and other characteristics, please ask us separately.

※N.B:Model 18 FLP series with spring return device and sealed version under IP54 have the operating temperature range of 0°C to + 60°C.
